Usability Questionnaire Insights

Unfortunately, we did not receive any submissions for the formative usability questionnaire that we had linked to before the meeting with the client. This provides its own form of feedback as to the survey being unclear or difficult to find during the presentation. For future client meetings, we will go for a more focused approach to questionnaires so that we are able to obtain the information we are looking for before the client leaves.

Summarized Insights

We received good feedback as to the accessibility of some of our design, as at times the pollinator logo was difficult to read due to the images behind it. We were also encouraged to enlarge the text and graphics on the 'Mission and Visions' page due to the importance of the message, and to add more advertisement for Smash Labs.

People Centered Design Choices

The lessons we learned in class and applied to the Hi-Fi design included ensuring there was no false-consensus effect, considering the seven fundamental design principals, and creating an MVP based on the needs of the client.
